

## **Appendix B: Interview with the Client about the design**

Client: Tania Jain Interview

Date: 16th October 2023

Interview Method: Google Mee

**A:** Hi Tania, thank you once again for meeting me. I just wanted to quickly show you a basic design of how the app will look and get you to sign off on it before I proceed.

**T:** Sure.

**A:** So as you can see here, there will be separate windows for students and admins. Most windows will have forms, the edit window will be the same as the add window, that's why I haven't included it here.

**T:** I think it looks pretty good so far on the student's end. I like how the forms all have a similar layout. I want to keep the design simple for them so it's intuitive and using the app is not a burden. Additionally, I'd like you to use shades of purple, teal, and blue, I'll send you the shades I've found online as the base for the colors of the app. I've taken a survey and consulted with my mentor and the internet and most sources have said these colors boost productivity.

**A:** Alright, sure I'll make sure to implement that in the app. Are there any other suggestions you want to make?

**T:** No I think the colors were the main aspect of it, the layout so far seems functional.

**A:** Alright thank you for your feedback, Tania.
